

# imagine:

**Artificial grass.  
We know what  
you're thinking.  
But bare with us.**

**Imagine creating something  
that defies boundaries.  
Imagine rooftop tennis courts  
and indoor gardens. Imagine  
working on projects that are  
not only a demonstration of  
stunning architecture, but that  
invite intrigue and inspiration.  
We know you're no stranger to  
innovation. So let's innovate.**

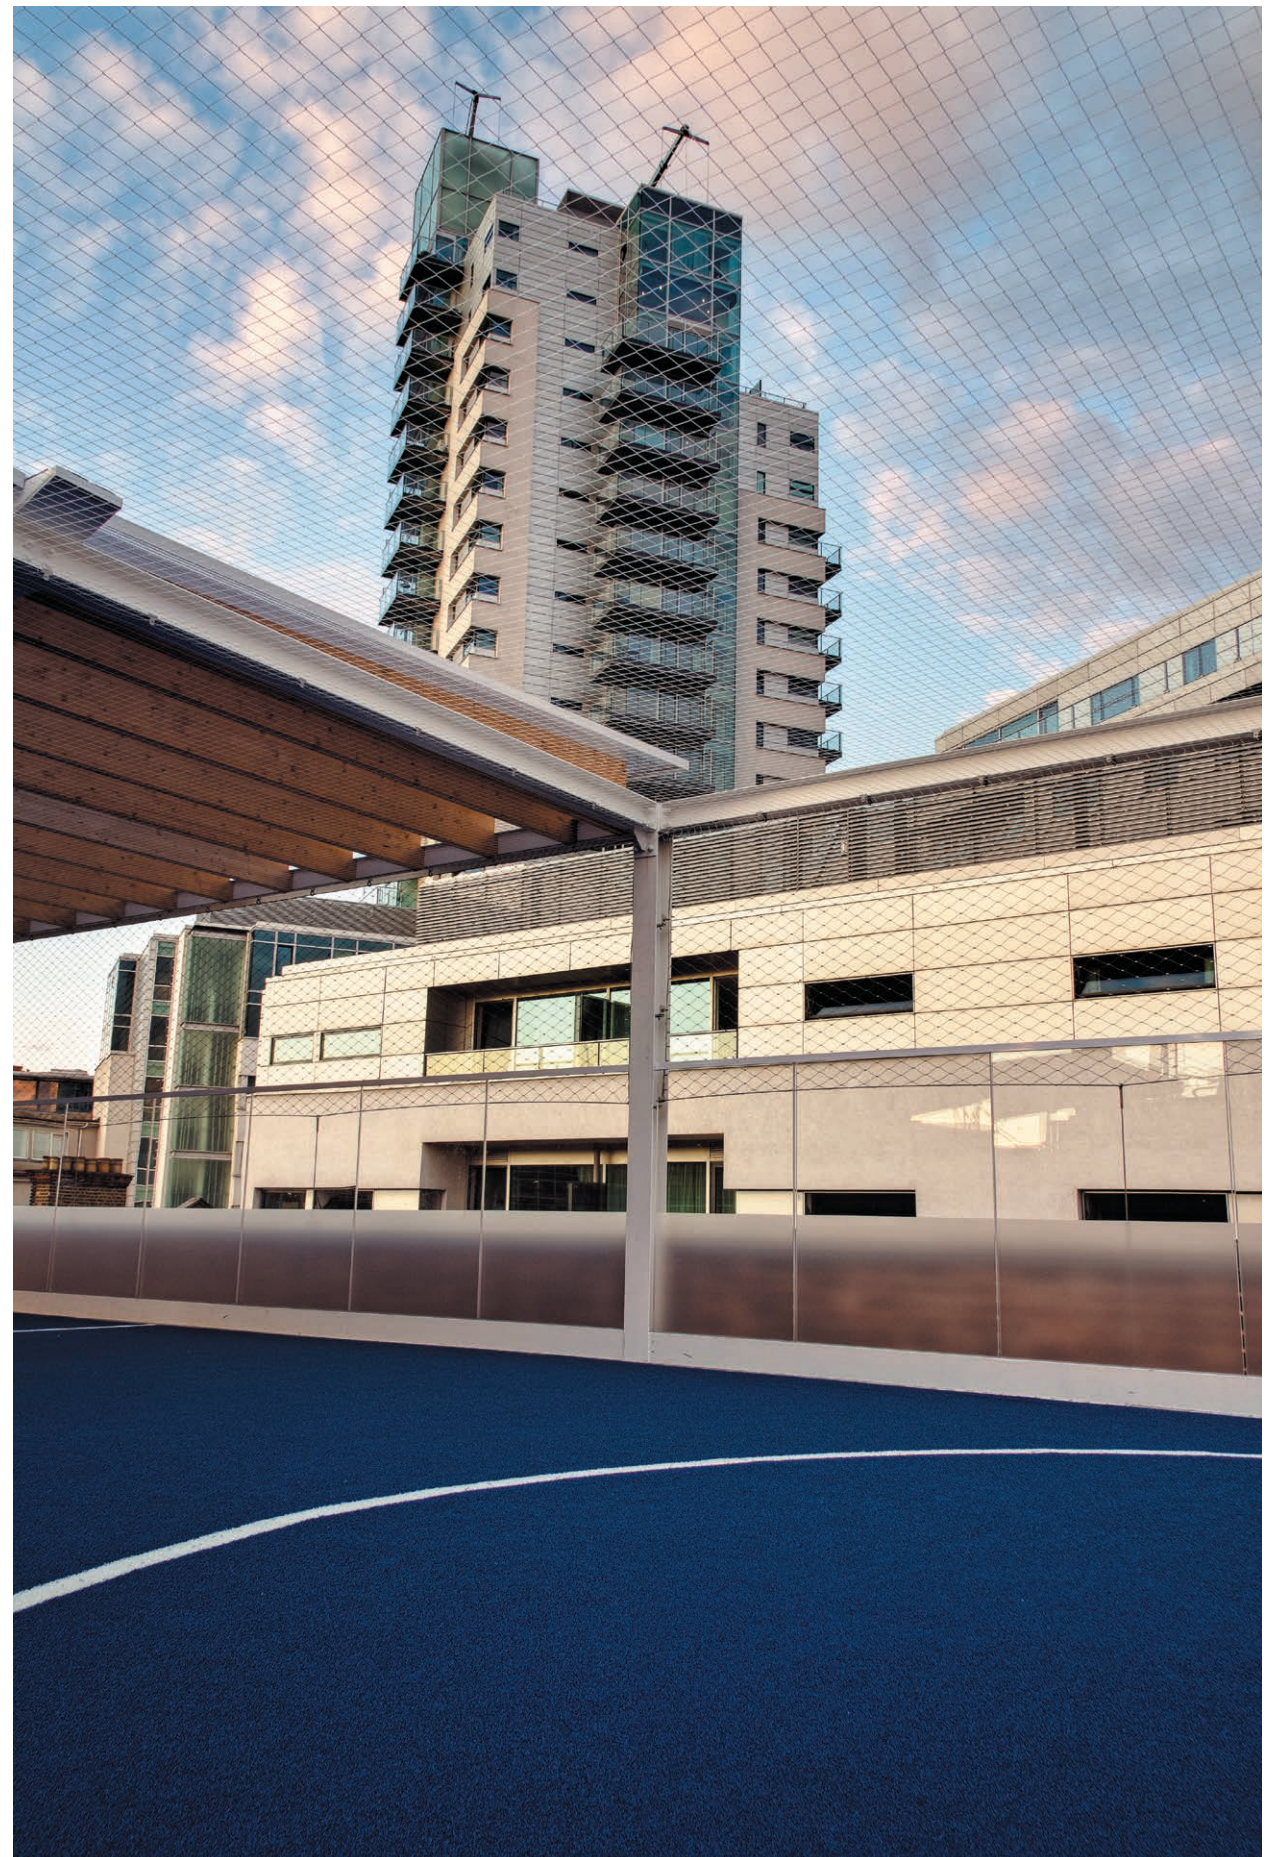

**Starting to think differently?  
Welcome to our world.  
You're going to love it.**

# imagine:

No limits.  
Not even the sky.

**Imagine making the impossible possible. The advanced technology we use allows us to create beautiful spaces in hard to reach places. With over fifteen years worth of experience, we use our expertise to innovate, challenge and explore in the architectural field.**

**It's our job to make things happen. That's why we only work with the highest quality products, tested to governing body standards. Our grass comes with a range of benefits, from perforation to UV stabilisation. Free draining grass means that, yes, you can build a garden in the sky.**

**Let's think big.**

# imagine:

Breaking the rules.

**Imagine creating stunning indoor gardens. Imagine conference rooms that inspire staff and invite picnics. This is about creating spaces that are original in the truest sense of the word.**

**We can lay grass on floors, walls and ceilings. In homes, on buildings, around schools and galleries. Diversity is our longest standing friend. We've been working over the domestic, corporate, education and landscaping sectors since artificial grass was born.**

**Imagine that.**

# imagine:

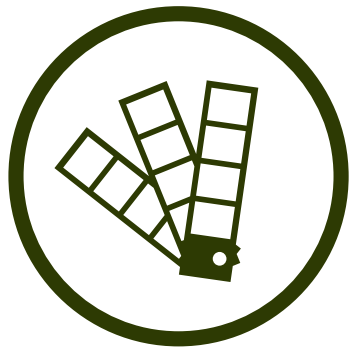

The possibilities.

# imagine:

## The benefits.

**A variety  
of colours**

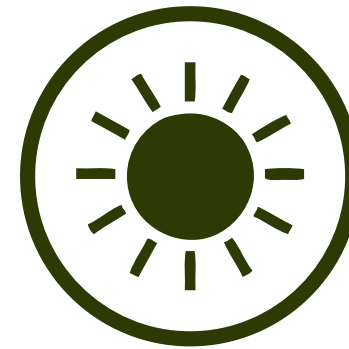

**20 year  
life span**

**8 year  
guarantee**

**Free  
drainage**

**Tested for UV  
stabilisation**

**Flame  
retardant**

# imagine:

**A company that knows architects. If it's important to you, it's important to us.**

**STM prides itself on being a leader in the artificial grass field (no pun intended). We work with advanced laser cutting technology, the highest quality products you can find, and extremely talented CAD designers. It's a recipe for success.**

**Imagine working with design and installation experts that make your life easy every step of the way, from initial concepts to stunning result.**

**It's all possible.**

# imagine:

**Finding out more.  
Call Holly at STM.**
