

What is sport to you?

To us, sport is more than just a game.

▼

Sport is community, training and participation. It's saturday mornings, wednesday evenings, aching muscles and team effort. Sport is a part of life, a weekly meeting, a daily push. We know that sport is important. That's why we provide synthetic turf technologies that let all this happen, all year round.

Who we are

We're proud to have been designing and installing synthetic turf surfaces for over 15 years. It's our mission to achieve continuous development and innovation in the world of sport, from local clubs to world class stadiums.

Because we like to keep one step ahead of the game, we've been able to work with some highly prestigious clients over the years. A highlight for us was the design and installation of artificial grass surrounds and technical areas for Twickenham Stadium. From grassroots to professional, we simply love sport.

So, take your time to get to know us a little; let's see if we can work together.

The STM Team

Football.

▼
Our football turf will be an essential member of your team. It works hard all year round. It won't miss a Saturday session just because it's raining, and it won't retire after a few years in the game. You're going to love it. We'd be willing to bet on it.

FIEA likes it

We use everything from community level to FIEA approved products for our pitches to make sure that every customer's unique needs are met. Strong, reliable, long-lasting; we wouldn't play it any other way.

You'll like it

Our installation process is smooth, our turf is designed to be long lasting, and it's made from all the clever technology that makes real grass look inadequate. It's the stuff you care about, and the stuff we care about too.

To view a table of product information go to page 26, where you'll find comprehensive details on yarn systems, accreditations and pile height.

The Technical Aspects

- Made from soft, non-abrasive fibres to hug the ball and allow sliding tackles
- Infilled with a layer of recycled rubber to add resilience and give a controlled ball bounce
- Bespoke pitch marking options, including five-a-side and training areas
- Fencing and lighting options
- Seating and shelter options

Hockey.

Our hockey turf is a real problem solver. It's there, rain or shine, and it's built for the sport: for hard passes, heavy falls, for running, tackling, scoring. It's a reliable friend, a trusted component of the game, and we're sure you won't regret adding it to your team.

The FIH likes it

We only use turf accredited by the International Hockey Federation for our hockey pitches. It just makes sense.

You'll like it

We use synthetic technology to design both wet and dry hockey pitches. We use special fibres and a sand layer that retains moisture to make our wet pitches stay, well, wetter for longer. This kind of advanced material means that real-grass problems are in the past - just where they should be.

To view a table of product information go to page 26, where you'll find comprehensive details on yarn systems, accreditations and pile height.

The Technical Aspects

- Made from densely tufted, soft curled yarns
- Sand dressed infill
- Laid over a rubber pad
- Manufactured in the UK in partnership with Tiger Turf
- Bespoke pitch marking options, including training areas
- Fencing and lighting options
- Seating and shelter options

Rugby.

Our rugby turf is tough. It's designed to enhance players' performance and last for years. It's not afraid of hard falls and heavy tackles, and it won't shy away from adverse weather. It's a real team player, in it for the long haul. You'll love it; it's a dead-cert.

The IRB likes it

We only use turf products recognised by The International Rugby Federation for our rugby turf because, well, they're the best and that's what we strive for.

You'll like it

Our installation process is quick and efficient, and we offer all the advice you could possibly need before, during and after. We'll keep your pitch maintained too. It's our job to make sure you get the most out of your grounds.

To view a table of product information go to page 26, where you'll find comprehensive details on yarn systems, accreditations and pile height.

The Technical Aspects

- Made from long, non-abrasive fibres
- Infilled with a layer of recycled rubber
- Fitted with an underlying pad to absorb impact
- Manufactured in the UK in partnership with Tiger Turf
- Bespoke pitch marking options, including training areas
- Fencing and lighting options
- Seating and shelter options

Tennis.

▼
Synthetic turf for tennis. It doesn't grow, doesn't get muddy and doesn't dry out. It's the highly advanced friend of a manicured lawn, durable and usable in all weather conditions. It will compliment your courts and increase your services come rain or shine. Happy days.

The ITF likes it

The International Tennis Federation are the big boys in tennis; the experts, the gurus. So it would only make sense that we use products approved by them for our tennis turfs.

You'll like it

Our tennis turf comes with so many options you'll feel a whole new world of sport opening up at your feet. We offer medium-slow and medium-fast surfaces that offer excellent spin and grip, and (naturally) come in a diverse range of colours.

To view a table of product information go to page 26, where you'll find comprehensive details on yarn systems, accreditations and pile height.

The Technical Aspects

- Made from short pile to take spin and offer excellent grip
- Manufactured in the UK in partnership with Tiger Turf
- Available in a range of colours
- Infilled with a layer of sand
- Bespoke pitch marking options, including training areas
- Fencing and lighting options
- Seating and shelter options

MUGAs.

▼
Multi Use Games Areas are wonderful multi-purpose hubs of sport. Colourful, practical, problem-solving surfaces that have become popular amongst the world's space-savers and budget-makers. Using pitch markings and different turf-types, we can create an area that accommodates a number of different sports, right there in one place.

How do we design them?

Firstly, we get to know you and your sport needs. We'll really get to grips with what you want from your MUGA, and then get our designers on the job to draw up some blue prints. We'll choose a selection of our FIEA, IRB, ITF and FIH approved products to create a pitch that performs at optimum level for every sport. We use coloured artificial turf too, for ultimate clarification between sports areas.

To view a table of product information go to page 26, where you'll find comprehensive details on yarn systems, accreditations and pile height.

Build your own virtual pitch.

▼
If you want to explore the possibilities of synthetic turf, try our pitch builder online. It's a really smart way of getting a feel for what you can include on your pitch, whatever the sport. You can even go so far as to build the whole pitch (virtually, of course), then we'll take it off your hands and produce the real thing.

Give it a go:
www.stmworld.co.uk/sportspitch-builder

If you need help navigating the different turf types, feel free to give us a call. We'll talk sport.

The benefits.

Bespoke design according to your club's needs

National Governing Body accredited surfaces

Unique pitch markings and surrounds

Individual warranties

Bespoke maintenance packages

The process.

Assessing your needs.

We'll talk with you to find out exactly what you want from your pitch. We'll talk products, performance, longevity and all additional extras such as pitch markings and goals. We'll assess costs and timings too, so everybody knows exactly what to expect.

Site investigation.

If you're happy with the designs, we'll come and measure the relevant area so that we can assess how much turf we'll need.

Design concepts.

Our expert designers will draw up some blueprints so that you can get a proper feel for what your pitch will look like. Then we'll provide an indicative quotation so you can start the funding process.

Construction.

Every surface we build is designed according to the sport it's required for. All aspects are built to be totally bespoke, from drainage, to macadam layers, to shock pads.

Fencing & lighting.

Finally, we'll offer all of the extras that make your grounds whole. You'll be able to choose from fencing and lighting options, and other equipment, such as seating and shelters.

Maintenance.

We offer ongoing maintenance plans, and will advise you on the measures you can take in house to keep your pitch performing at optimum level. When the time comes, we'll resurface it too.

Let's get the ball rolling.

If you're interested in any of our services, we'd love to hear from you.
